DETAILED ACTION

Allowable Subject Matter

1. Claims 2, 5-11, 13, 16-19, 21, 24-27, 29, 33-36 and 38-47 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's claimed invention discloses a product, method and system for providing fine-grained, identity-based access control in a computer networking environment. The closest prior art of record, Stallings Cryptography and Network Security (a portion of which is a disclosure on IPsec), Boyle USPN 5,940,591 and Jason et al. USPN 6,636,520 discloses a similar invention; however, the prior art does not suggest nor teach individually nor in combination the further limitation of mutually authenticated network-layer security associations between end devices and secure boundary device(s), wherein packet-handling directives that are generated by an access control function based on access privileges granted on the identities of the end devices established in the security associations are securely received by an enforcement function to either forward or discard a received data packet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jung W. Kim whose telephone number is (571) 272-3804. The examiner can normally be reached on M-F 9:00-5:00.
